

FACOM W.400SUP - Workshop Press Support

W.400SUP

DESCRIPTION

FACOM W.400SUP - Workshop Press Support

Features

Universally adjustable press support for use in standard workshop presses

Puts an end to dangerous wobbling structures and minimises risks of injuries

The special layout of the mounting threads and the height-adjustable long and short support included in the scope of delivery ensure precise support

Centring attachments for fixing the support bolts in a hole on the component

Can also be used in conjunction with standard puller and pressure sleeve sets – centring via the receiving thread on the centre of the press table support

For universal use for the removal and installation of wheel bearings, bushings, sleeves, silent bearings etc

2 adjustable barriers on the base of the support prevent unwanted slippage on the press table

height max : 220 mm

height min :145 mm

Dimensions (LxW)

300x300mm
